Justin Almassi

EXPERIENCE

TD Bank February, 2021 – Present

Automation Engineer

Toronto, ON

- · Developed programs in both Java and Python to automate end-to-end processes in the development environment
- Built **Twilio API** system with **Java** and **Javascript** to receive text messages and voice calls, and automatically react to caller instructions using **serverless functions**
- Created **Dynatrace API** GUI tool in Python to collect data on environment problems and user sessions for full stack problem analysis
- Troubleshoot environment problems with Splunk logs in conjunction with Dynatrace API and UI tracing
- Helped upload automation program to Docker with Kubernetes and Jenkins

FDM Group July 2020 – Present

Software Developer Trainee

Toronto, ON

Prep Academy February 2018 – Present

Computer Science and Math Tutor

Toronto, ON

- Taught high school and university students in computer science, math and physics
- Prepared private school students for their exams, tests, and projects in C, Java and Python

Canterbury Clinic

September, 2017 - September, 2019

IT Administrator and Web Developer

Toronto, ON

- · Created the Canterbury website using HTML/CSS and Javascript
- · Solved any technical difficulties, such as freezes and crashes, and maintained the security of the patient information
- Managed the intake of patients and scheduled appointments.

Ryerson University

March, 2019 – August, 2019

Research Assistant - Social Network Model

Toronto, ON

- · Used XAMPP, Python and SQL to store and process millions of tweets for language processing
- Modeled the tweet text with tokenization cleaning and DF-IDF, then processed the data using K-Means cluster analysis

PROJECTS

Ganjee Marketplace

Developed an e-commerce marketplace using React, Node.js, Express, Axios, Mongoose, and MongoDB

Bargain Bin

 Created a stock web app to search stock prices and scrape the internet for worst performing stocks using Angular, Node.js, Express and Scrapy
